Bare Minimum Requirements

Failure to include any of these items will result in a (0) zero for the assignment:
- Two viewable, fully functioning forms with default items, that is consistent and appropriate for the theme of your application.
- All inputs have corresponding labels, **and** Dropdown Choosers have pre-filled values from which to choose.
- Live (clickable) links to both the repository **and** the working app published to github via the gh-pages branch.
- A fully functioning GOLD app and a fully functioning BRONZE app.

Project Rubric

Topic	%	Excellent (100%)	Good (75%)	Fair (30%)	Poor (0%)
Pattern Requirements :: Both GOLD and BRONZE patterns must be implemented, or no points will be given for the topic.					
Form Selections	20	Two Input Hints, Input Prompts, and Dropdown Chooser patterns are implemented using semantic elements and appropriate classes.	Some minor problems with semantic elements, appropriate classes or markup, jQuery library usage, or JavaScript. The application still works, but the implementation could be improved.		Any one of: • Gross pattern mis-implementation • Major markup problems • Non-functional JavaScript • Not enough items • Non-functional links • Either Right or Wrong missing
Good Defaults	20	Appropriate Good Default values are present for range slider, date-field, and checkbox elements.			
Prominent Done Button	10	The placement of the primary action and/or secondary buttons are appropriate for the context and intended use of the form.			
Same-Page Error Messages	20	Error messages are shown either above the form, next to the invalid form input, and/or in a modal dialog.			
Validation Saves to Local Storage	10	Both forms validate and the data is saved to local storage.			
Big Picture Requirements					
Justification	15	The reflection video includes a thoughtful walk-through of each implementation decision for the pattern requirements.	Each pattern choice is explained, but some points seem misunderstood or unclear.	Missing pattern choice explanations, or obvious lack of understanding.	No justification given for choices, or gross lack of understanding.
Investment	5	The design and implementation show creativity and personal investment.		Some lack of creativity or investment.	Little to no attempt at creativity or investment.
Be careful: your Professionalism grade is also affected by your Justification and Investment deductions.
